Define your goals. Understand your objectives.

Date	
Name	
Type and purpose of the account (e.g. RRSP – retirement savings)	

As an investor, you are unique.

Your financial goals, current financial situation, investment experience and attitude towards risk all help determine the mix of assets that's just right for you. You need to define your goals and assess your current financial situation. You need to be honest with yourself about your investment experience and your attitude towards risk. Only after defining these factors can you start on the path to developing a plan for your savings and/or income needs.

The questions in this investor profile questionnaire were designed to help you understand your investment objectives and your investment personality. You may use this service to support your investment-making decision or to select a Canada Life[™] allocation fund tailored to your needs.

As you answer the following questions, remember there is no right or wrong answer. However, keep in mind that you must be completely candid, or the results won't reflect your true investment personality. Please answer each question and find your score in the box next to each answer. Enter the score into the space provided after each question. Your total score will help you define your investment profile.

If you have more than one account, please consider filling out one questionnaire for each account. Each account you hold may have a different purpose, which may affect your investment decisions.

The following 14 questions will help you understand your investment profile, and enable you and your financial advisor to develop a personal investment plan that suits your needs and goals.

Questionnaire

Please check the box that best describes your personal situation.

Section 4

Attitude towards risk

	9.	Wh	ich be	est describes how much you know about investing?	
			(2)	I have very little knowledge and I rely exclusively on the recommendations of financial advisors.	
			(5)	I have limited knowledge of stocks and bonds, but I do not follow financial markets.	Total for this
			(8)	I have good working knowledge and I regularly follow financial markets.	question
			(10)	I understand completely how different investment products work; including stocks and bonds, and I follow financial markets closely.	
	10	-		ovestments lose significant value because of downturns in the market, how long prepared to hold your existing investments in anticipation of a recovery in value?	
7	a		(5)	Less than 3 months	
*	b		(8)	3 to 6 months	
			(10)	6 months to 1 year	Total for this
			(15)	1 to 2 years	question
			(20)	2 to 3 years	
			(25)	3 years or more	
	11			ng that you are investing \$100,000 for the long term, what is the maximum your portfolio's value that you could comfortably tolerate in any given year?	
7	a		(2)	I'd be uncomfortable with any loss.	
•	b		(5)	A \$5,000 drop is all I could live with.	
			(10)	A \$10,000 decline is something I could tolerate.	Total for this
			(15)	A \$15,000 drop would be about all I could stand.	question
			(20)	A \$20,000 decline is my limit.	
			(25)	I could live with a decline of more than \$20,000.	
	12			the following statements would you feel most correctly describes estment philosophy?	
7	a		(5)	I cannot accept any fluctuation in principal.	
*	b		(10)	I can only accept minimal fluctuations, and prefer to invest in safer, lower return investments.	Total for this
			(20)	I am willing to tolerate some ups and downs in the value of my investments to achieve overall higher returns in the long run.	question
			(30)	My main interest is high, long-term returns and I am not concerned about short-term decreases in the value of my investments.	
					Total for Section 4

You answered (a) or (b) to questions 10, 11 and 12, therefore you cannot tolerate any losses. Evaluate your need for growth and carefully consider your desire for stability. Portfolios without fluctuations in value generally have no growth component.

Section 5

Portfolio volatility

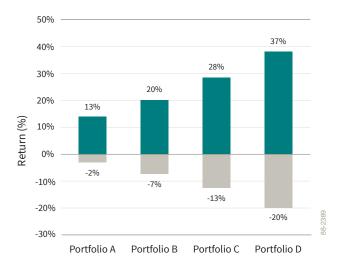

Investment portfolios aimed at providing higher returns tend to have greater swings in value (providing both gains and losses). The more aggressive your portfolio, the more pronounced these swings become, and the more often short-term losses can occur.

13. A portfolio is a basket of different investments. The returns earned by a portfolio depend on its mix of investments. The following graph shows the probable range of returns (from best to worst) of four hypothetical portfolios over a one-year period. Which of these portfolios would you prefer to invest in?

- (20) Portfolio C
- ☐ (30) Portfolio D

14. Some investors are more willing than others to accept periodic declines in the value of the portfolio as a trade-off for potentially higher long-term returns. Which response best represents your feelings toward the following statement?

Total for this

I am willing to experience potentially large and frequent declines in the value of my investment if it will increase the likelihood of higher long-term returns.

- ☐ (20) Strongly agree
- ☐ (15) Agree
- ☐ (10) Disagree
- ☐ (5) Strongly disagree

Your score	Investment profile		Investor profile	Canada Life asset allocation fund objective
105 or less		6 Equity 6 Fixed income	Suited to investors seeking a portfolio that provides regular income with low volatility.	This fund invests mainly in other fixed-income funds. It includes a small investment in equity funds to increase potential returns over the long run.
106 to 135		6 Equity 6 Fixed income	Suited to investors seeking a portfolio that provides income while also allowing for long-term growth of your investment.	This fund invests mainly in other fixed-income funds. It also includes a significant investment in equity funds to provide an opportunity for long-term growth.
136 to 164		6 Equity 6 Fixed income	Suited to investors seeking a portfolio that provides a balance between income and long-term growth.	This fund invests mainly in funds that overall have slightly more equity investments (such as shares) than fixed-income investments (such as bonds).
165 to 199		6 Equity 6 Fixed income	Suited to investors seeking a portfolio that provides long-term growth with some income.	This fund invests mainly in equity funds. To provide a degree of stability, it invests a smaller amount in funds that invest in fixed-income securities and real estate.
200 or more	AGGRESSIVE 100	% Equity	Suited to investors seeking a portfolio that provides long-term growth of your investment.	This fund invests mainly in equity funds, with the aim of providing long-term growth with little concern about short-term volatility.

As a general rule, you should have an emergency fund to cover at least three months of your basic living expenses. Consider building an emergency fund based on cash or cash equivalents such as daily interest plans, short-term guaranteed investment certificates (GICs) or money-market funds.

Important information concerning Canada Life Portfolio recommendation tool

The Portfolio recommendation tool helps you and your advisor assess your financial circumstances, investment time frame and attitude toward risk for the purposes of allocating funds amongst the broad range of segregated funds offered by Canada Life.

While reasonable efforts have been made to ensure the accuracy of the information and calculations in the tool, you're responsible for determining the most appropriate allocation to meet your needs. Canada Life is not responsible for any damages resulting from the use of the Canada Life Portfolio recommendation tool by your advisor or any other person, however caused.

As a general rule, you should have an emergency fund to cover at least three months of your basic living expenses. Consider building an emergency fund based on cash or cash equivalents, such as daily interest plans, short-term guaranteed investments (GIs) or money market funds.

The Canada Life Portfolio recommendation tool addresses long-term investment goals so it doesn't include GIs or money market funds. If you have shorter-term goals (like saving for a vacation) and are also planning for the longer-term (like your retirement), you may want to consider a combination of investment funds and other products. Your advisor can help you create a plan to meet your financial needs.

A description of the key features of the segregated fund policy is contained in the information folder. Any amount that is allocated to a segregated fund is invested at the risk of the policy holder and may increase or decrease in value.
